

108" Second Service Overview

Our Professional Services are delivered by a team of highly skilled project managers who are trained across a wide range of Cisco products and technologies. Working closely with our customers, all project managers take full control of the projects they are tasked with, from original planning and briefing sessions to the successful delivery of all project objectives.

Advanced Technology Services

Data Lines

We source the most cost-effective data lines for your business needs. Our service covers leased lines, Internet lines and fibre optic cables.

With a thorough understanding of the factors affecting both price and service quality, we can reduce your costs AND ensure that you get a best-fit data line solution that covers your current needs whilst also providing a platform for future development.

Business VoIP

Business VoIP (Voice over IP) solution offers customers lower costs whilst enabling increased productivity. It offers secure, business-quality VoIP solution with easy integration to any existing voice infrastructure delivered on a resilient, high-capacity communications platform.

HW Procurement

Namkon is the authorized Cisco partner. Cisco is a leader in networking technologies that transform how people connect, communicate, and collaborate. We strongly agree with Cisco's philosophy of listening to their customers' needs, ideas, and challenges to stay ahead of market shifts and be first with technology solutions.

Routing & Switching

Namkon will assist you in making sure your routing and switching networks remain optimized to support your business objectives. We share our technical knowledge and leading operational practices, complementing our customer's business objectives.

Security

Namkon has a security specialists who assist customers across a broad spectrum of network security. These may include firewalls, VPN access, router & switch security and endpoint security all of which require the same high level of technical expertise and industry knowledge.

Wireless

Namkon's pride themselves on their wireless LAN security testing and wireless LAN health. These areas coupled with the wireless LAN installation and commissioning services ensure all customers can be confident that no stone is left unturned when setting up a wireless network.

IT Support Services

Maintenance

Namkon supports a range of live Cisco hardware maintenance contracts across the entire EMEA. We provide software maintenance, multi-technology support across all Cisco devices.

Installation

Namkon provides a full network installation service, diagnosing and implementing hardware and software issues across the LAN and WAN.

Monitoring Services

Namkon delivers a remote network monitoring solution which to monitor your networks remotely in a safe and secure environment 24/7. We monitor a wide range of complex networks and quickly alert customers of potential problems before they have a significant impact on a business.

Pre-sales Support

Pre-sales offers support across a wide range of deliverables from Senior Engineering Consultancy, Network Design and Configurations to Project Management.
